<sup>1</sup> Preliminary.<sup>2</sup> Includes cattle ordinarily dutiable.<sup>3</sup> Less than 500.<sup>4</sup> Trade data for Germany include Austria beginning May 6, 1938; Sudeten area as far as ascertainable beginning Nov. 10, 1938; Czecho-Slovak provinces occupied by Germany beginning Mar. 18 or 19, 1939, and Memel beginning Mar. 25, 1939.<sup>5</sup> The Latin American republics include Costa Rica, Guatemala, Honduras, Nicaragua, Panama Republic, Panama Canal Zone, El Salvador, Mexico, Cuba, Dominican Republic, Haiti, Argentina, Bolivia, Brazil, Chile, Colombia, Ecuador, Paraguay, Peru, Uruguay, and Venezuela.<sup>6</sup> Prior to Feb. 15, 1936, included in "Other cheese."<sup>7</sup> Feb. 15-June 30.<sup>8</sup> Prior to June 15, 1936, included in "Other cheese."<sup>9</sup> June 15-30.<sup>10</sup> Prior to Jan. 1, 1936, included in "Other cheese."<sup>11</sup> Jan. 1-June 30.<sup>12</sup> Prior to Feb. 1, 1936, included in "Other cheese."<sup>13</sup> Feb. 1-June 30.<sup>14</sup> Prior to Jan. 1, 1938, includes Burma.<sup>15</sup> The British West Indies include Bermuda, Barbados, Jamaica, Trinidad, Tobago, and other smaller British Islands in the West Indies, not specified.<sup>16</sup> Prior to Jan. 1, 1936, reported in pounds, only; beginning Jan. 1, 1936, reported in pieces, only.<sup>17</sup> July 1-Dec. 31.<sup>18</sup> Not reported separately prior to Jan. 1, 1938.<sup>19</sup> Bales of 478 pounds, net.<sup>20</sup> Prior to Jan. 1, 1936, included in cotton waste.<sup>21</sup> Ton of 2,240 pounds.<sup>22</sup> Includes coir fiber, maguey or cantala, palm leaf fiber not specially provided for, pulu, raffia, ramie or China grass, sunn, and other fibers not specially provided for.<sup>23</sup> Boxes of 76 pounds, net.<sup>24</sup> Trade data for Hungary include Czecho-Slovak provinces occupied by Hungary beginning Mar. 18 or 19, 1939.<sup>25</sup> Trade data for Poland and Danzig include Czecho-Slovak provinces occupied by Poland beginning Mar. 18 or 19, 1939.<sup>26</sup> Imports from Cuba.<sup>27</sup> Includes broken rice prior to Feb. 1, 1936.<sup>28</sup> Included with "Rice flour, meal, polish, and bran" prior to Feb. 1, 1936.<sup>29</sup> Includes 731,000 bushels from Netherlands and 522,000 bushels from Hungary.<sup>30</sup> Includes 1,728,000 bushels from Latvia.<sup>31</sup> Less than one-half barrel.<sup>32</sup> Ton of 2,000 pounds.<sup>33</sup> Imports from Mexico.<sup>34</sup> Imports from British India.<sup>35</sup> Included with "Peanuts, shelled."<sup>36</sup> Imports from Rumania.<sup>37</sup> Not separately classified prior to Jan. 1, 1936.<sup>38</sup> Imports from Argentina.<sup>39</sup> Bushels of 57 pounds.<sup>40</sup> Bushels of 60 pounds.<sup>41</sup> Includes milk of rubber or latex.<sup>42</sup> Prior to Jan. 1, 1936, excludes gutta siak and other guttas, not elsewhere specified.

Office of Foreign Agricultural Relations. Compiled from official records of the Bureau of Foreign and Domestic Commerce and the United States Tariff Commission.

*General note.* This table, as published in the 1941 Agricultural Statistics, included 90 commodities. 35 commodities have been added. They include fresh pears, oiticica oil, hides and skins by types, and additional classes of cheese, vegetable fibers, and rubber and allied gums. Certain other tables have been reconstructed to show trade with Latin America.

<sup>1</sup> Preliminary.  
<sup>2</sup> International Yearbook of Agricultural Statistics.

<sup>3</sup> Java and Madura only.

<sup>4</sup> January only, last published data.

<sup>5</sup> 4-year average

<sup>6</sup> Includes British Cameroon.

<sup>7</sup> Beginning April 1938, trade between Germany and Austria no longer reported as foreign trade in the German statistics. The same applies to trade between Germany and Sudetenland for the period October-December 1938.

<sup>8</sup> January-April, last published data.

<sup>9</sup> January-March, last published data.

<sup>10</sup> April-December, full year not available.

<sup>11</sup> January-June, last published data.

Bureau of Agricultural Economics. Compiled from official sources except as otherwise stated. Figures for rubber include so-called India rubber, caoutchouc, caucho, jebe (Peru), hule (Mexico), borracha, massaranduba, mangabeira, maniconda, sorva, and seringa (Brazil), gomelastiek (Netherlands Indies), caura, and ser nambi (Venezuela).

<sup>1</sup> Preliminary.

<sup>2</sup> International Yearbook of Agricultural Statistics.

<sup>3</sup> Java and Madura only.

<sup>4</sup> Reexports cannot be separated.

<sup>5</sup> Excess of reexports.

<sup>6</sup> January only, last published data.

<sup>7</sup> January-July, last published data.

<sup>8</sup> Beginning April 1938, trade between Germany and Austria no longer reported as foreign trade in the German statistics. The same applies to trade between Germany and Sudetenland for the period October-December 1938.

<sup>9</sup> Includes a small amount of surrogate.

<sup>10</sup> 2-year average.

<sup>11</sup> April-December: full year not available.

<sup>12</sup> January-April, last published data.

<sup>13</sup> 4-year average, last published data.

<sup>14</sup> January-June, last published data.

<sup>15</sup> January-March, last published data.

Bureau of Agricultural Economics. Compiled from official sources except as otherwise stated. The item "coffee" comprises unhulled and hulled, ground or otherwise prepared, but imitation or "surrogate" coffee and chicory are excluded, except where otherwise noted.

11 Includes yerba mate and imitation tea, which are not separately reported after 1929.

12 January only, last published data.

13 January-July, last published data.

14 Not shown prior to 1932; included with data for China.

15 3-year average.

16 January-June, last published data.

Bureau of Agricultural Economics. Compiled from official sources except as otherwise stated. These figures are for tea leaves only; tea dust and sweepings and yerba mate are not included when separately reported.

17 Years beginning March 22, 1925-30; June 22, 1931-38; and March 22, 1939, to date.

18 4-year average.

19 9 months, June 22-Mar. 21.

20 Beginning April 1938, trade between Germany and Austria no longer reported as foreign trade in the German statistics. The same applies to trade between Germany and Sudetenland for the period October-December 1938.

TABLE 700.—Cacao beans: *International trade, averages 1925-29 and 1930-34, annual 1937-40*

6 Export figures for all the importing countries except Colombia are reexports.

7 Including roasted.

8 Including shells.

9 9 months, April 1—December 31.

Office of Foreign Agricultural Relations.

1 Preliminary.

2 Including some shipments from British mandated Togoland.

3 International Yearbook of Agricultural Statistics.

4 Less than 500 pounds.

5 October 1—September 30.

## FARM CAPITAL AND INCOME STATISTICS

<sup>1</sup> Corn, oats, barley, grain sorghums.<sup>2</sup> Wheat, rye, buckwheat, rice.<sup>3</sup> Preliminary.<sup>4</sup> Included in total crop acreage but largely interplanted in corn.<sup>5</sup> Beans (dry edible), soybeans, cowpeas, peanuts, and velvetbeans as shown in previous columns, thus omitting cowpeas and soybeans cut for hay, and the soybeans, cowpeas, and peanuts grazed, hogged, or plowed under for soil improvement.<sup>6</sup> Asparagus, snap beans, cabbage, sweet corn, cucumbers, peas, spinach, and tomatoes for processing.<sup>7</sup> Asparagus, snap beans, cabbage, cantaloups, carrots, cauliflower, celery, cucumbers, lettuce, onions, peas, spinach, tomatoes, and watermelons grown commercially for market. Excludes farm gardens and most market gardens.<sup>8</sup> Corn, oats, barley, wheat, rye, buckwheat, rice, flaxseed, cotton, tame hay, wild hay, dry edible beans, potatoes, sweetpotatoes, tobacco, sugar beets, and sugarcane.<sup>9</sup> Totals are for crops shown in preceding columns, omitting alfalfa seed, red clover seed, alsike clover seed, and lespedeza seed, which are assumed to be largely included in the acreage cut for hay. Other crops not included are sweet corn for market, some of the less important commercial vegetables (166,000 acres in 1941), farm gardens, most market gardens, minor seeds, hops, spelt, field peas, various legumes and other crops harvested by livestock (footnote 5), minor crops, and fruits and nuts. The acreages shown include some crops harvested in succession from the same land and a few interpolated items.<sup>10</sup> Preceding column plus estimates of acreages planted to 9 crops and not harvested because of abandonment.<sup>11</sup> Includes cranberries, commercial strawberries, grapes, planted nuts, and principal tree fruits, except cherries. Excludes bush fruits and more than a million acres of fruit and nut trees not of bearing age (in 1935).

Agricultural Marketing Service. This table does not include revisions made after December 1941.

TABLE 717.—Crop summary: Acreage and production (average 1930-39), and value, United States, annual 1940 and 1941

## CROP SUMMARY

639

| Crop   | Acreage harvested  |                    |                    | Production              |                  |                   | Farm value           |                      |

<sup>1</sup> Preliminary.<sup>2</sup> Value of "all wheat" differs slightly from sum of wheat by kinds because of rounding of "all wheat" price.<sup>3</sup> All purposes.<sup>4</sup> Not included in tame hay.<sup>5</sup> Bag of 100 pounds (uncleaned).<sup>6</sup> Values apply to the production of cleaned beans.<sup>7</sup> 1,000 trees tapped.<sup>8</sup> Includes some quantities not harvested. Values apply only to the harvested portion of the crop.<sup>9</sup> See footnote 1 on table 279.<sup>10</sup> Short-time average.<sup>11</sup> Production includes all grapes for fresh fruit, juice, wine, and raisins.<sup>12</sup> Estimates of farm value apply to the entire crop, exclusive of that portion donated to charity and/or eliminated on account of market conditions.<sup>13</sup> Pounds of oil.<sup>14</sup> Excluding crops not harvested, minor crops, duplicated seed acreages, strawberries, and other fruits.

Agricultural Marketing Service. This table does not include revisions made after December 1941.

<sup>1</sup> Unless otherwise stated, these data are estimates based on information furnished by farm families to the Bureau of Agricultural Economics, adjusted to the census data of 1920, 1930, 1935, and 1940. Revised September 1942.

<sup>2</sup> Except for 1910 and 1920, these are estimates by the Bureau of the Census.

<sup>3</sup> Census enumerations as of Apr. 15, 1910, and Jan. 1, 1920.

<sup>4</sup> Estimated by the Bureau of the Census.

<sup>5</sup> Estimates not available.

<sup>6</sup> Census enumerations as of Jan. 1, 1920, and Jan. 1, 1935.

Bureau of Agricultural Economics, Division of Farm Population and Rural Welfare.

TABLE 721.—Total population and farm population, by geographic divisions, Jan. 1, 1930-42; births and deaths occurring in the farm population, and number of persons moving to and from farms, 1930-41<sup>1</sup>

<sup>1</sup> Estimated by the Bureau of the Census; based on the number of farms in 1910, average farm population per farm in 1920, and change in the average number of persons per family in the rural population between 1910 and 1920.

<sup>2</sup> Enumerated by the Bureau of the Census.

TABLE 723.—Index numbers of prices paid by farmers, United States, 1910-41  
[Calendar years 1910-14=100]

| Year      | Commodities used in production |                             |            |   |                        |                   | Wage rates paid to hired labor | Commodities bought for family maintenance <sup>3</sup> | All commodities bought for use in production and family maintenance |
|-----------|--------------------------------|-----------------------------|------------|---|------------------------|-------------------|--------------------------------|--|---|
|           | Feed                           | Farm machinery <sup>1</sup> | Fertilizer | Building materials for other than house | Equipment and supplies | Seed <sup>2</sup> |                                |  |   |
| 1910..... | 93                             | 102                         | 99         | 100                                     | 101                    | -----             | 98                             | 97   | 97  |
| 1911..... | 107                            | 101                         | 99         | 103                                     | 100                    | -----             | 103                            | 98   | 101   |

<sup>1</sup> Excluding tractors.

<sup>2</sup> 1912-14=100.

<sup>3</sup> Includes food, clothing, operating expenses, furniture and furnishings, building materials for house, and automobiles.

Bureau of Agricultural Economics and Agricultural Marketing Service. Compiled from prices reported to the Department of Agriculture by retail dealers throughout the United States. The prices used in constructing the above index numbers of prices paid by farmers are for constant quantities and sizes but are not adjusted for changes in quality. Over a period of years marked changes may occur in the quality of certain commodities. For example, a study by the American Society of Agricultural Engineers indicated an improvement in quality of farm machinery of about 70 percent between 1910-14 and 1932.

The index numbers include only commodities bought by farmers, the commodities being weighted according to purchases reported by actual farmers in farm-management and rural-life studies from 1924 to 1929.

TABLE 724.—*Index numbers of prices received by farmers, by groups, United States, 1910-41*

[August 1909-July 1914=100]

Bureau of Agricultural Economics and Agricultural Marketing Service. Prices of farm products received by farmers collected monthly from a list of about 12,000 special price reporters. This list is made up almost entirely of country-town dealers, elevator managers, buyers, and merchants.

Data for 1910-31 in 1935 Yearbook, table 472.

TABLE 726.—*Index numbers of wholesale prices, by groups of commodities, United States, 1910-41*

[Calendar years 1910-14=100]

| Year      | Farm products | Foods | Hides and leather products | Textile products | Fuel and lighting | Metals and metal products | Building materials | Chemicals and allied products <sup>1</sup> | House furnishing goods | Miscellaneous | Other than farm products | All commodities |

<sup>1</sup> Beginning 1932 alternative rates, depending on loading, were established. To preserve comparability, rate for highest weight to which shippers could load without having cotton compressed at own expense was used in computation of index.

<sup>2</sup> Revised.

<sup>3</sup> Preliminary. Based on rates in effect through Jan. 7, 1942.

Bureau of Agricultural Economics. These relatives are based on the average of the rates in effect during the crop year. See also table 729.

TABLE 729.—*Index numbers of railroad freight rates on fresh fruits and vegetables from specified origin areas to destinations in United States, 1913-41*

[July 1924 to June 1930=100]

<sup>1</sup> Texas rates are included throughout. The exceptional behavior of the "paper rates" on hypothetical shipments of Texas citrus before the development of the Texas citrus industry renders inadvisable the publication of the Texas series for the years 1913 to 1921. The distorting influence upon the national citrus index is not serious.

<sup>2</sup> Origin areas represented are not limited to those for which separate index numbers are given.

<sup>3</sup> Revised.

<sup>4</sup> Preliminary. Based on rates in effect through Jan. 7, 1942.

Bureau of Agricultural Economics. The above index numbers are of the weighted aggregative type. They are based upon averages of rates in effect during the year, in the computation of which successively applicable rates are weighted by the estimated proportion of annual shipments moved thereon, assuming an average seasonal distribution of shipments. The weights used in computing the index numbers are based on average tons shipped during the 5-year period, 1934-38 inclusive. For a further discussion, see "Index Numbers of Railroad Freight Rates on Perishable Agricultural Shipments, United States, 1913-38," United States Department of Agriculture, Bureau of Agricultural Economics, January 1941.

See footnotes at end of table.

<sup>1</sup> This table is a supplement to table 703, *Agricultural Statistics, 1941*, and is one of a series published since 1933.

<sup>2</sup> These data were secured by a State university, agricultural college, or agricultural experiment station, in some cases in cooperation with the Extension Service or the Bureau of Agricultural Economics of the U. S. Department of Agriculture, or by the Farm Security Administration. The borrowers from the Farm Security Administration are low-income farm families.

<sup>3</sup> Various farm methods of evaluating farm-furnished goods were used. Other farm-furnished goods consist only of fuel in 23 of the 53 reports, and combinations of fuel, ice, soap, wool, cotton, and/or tobacco in 9 of the reports. Farm-furnished fuel is included under farm-furnished food in 5 of the studies instead of being shown separately; and in the remaining 16 reports, value of other farm-furnished goods was not given.

<sup>4</sup> Includes repairs of family home; insurance premiums on family home; and other expenses such as rent at school and pay for lodging for members of the family while traveling or on vacation.

<sup>5</sup> Includes net cost of automobile purchased and expense of maintenance and operation after deducting proportion chargeable to farm and other business.

<sup>6</sup> Includes transportation other than by automobile, personal care, tobacco, unitemized personal expenditures, and other family expenditures, such as funerals, cemetery lots, and legal services.

<sup>7</sup> Change in net worth is generally defined to include all changes in assets and liabilities—savings, investments, unpaid bills, mortgages due, and the value of livestock owned and crops stored for sale. The reports on F. S. A. borrowers usually include, in addition, the change in value of household inventory. The figures given in the other reports take into account, for the most part, only increases in assets and/or decreases in liabilities, such as life insurance, savings, house improvements, and payments on debts.

<sup>8</sup> Not reported.

<sup>9</sup> Data obtained from fewer than the total number of families studied.

<sup>10</sup> Incomplete total; see items not reported as indicated by footnote 8.

<sup>11</sup> Tobacco included under education, reading, recreation instead of under other.

<sup>12</sup> Room and board at school included under education, reading, recreation instead of under housing and food, respectively.

<sup>13</sup> Transportation other than by automobile included under household operation instead of under other.

<sup>14</sup> Includes improvements on the home; one-half the taxes, fire insurance, and interest on the mortgage.

<sup>15</sup> Transportation other than by automobile included under automobile instead of under other.

<sup>16</sup> Major improvements on owned homes such as installation of water systems and electricity included under housing instead of under change in net worth.

<sup>17</sup> Radios included under furnishings and equipment instead of under education, reading, recreation.

<sup>18</sup> Funerals and cemetery lots included under medical care instead of under other.

<sup>19</sup> Transportation other than by automobile included under education, reading, recreation instead of under other.

<sup>20</sup> Housing included under furnishings and equipment instead of being shown separately.

<sup>21</sup> Includes expenditures for automobile operation but not for automobile purchase.

<sup>22</sup> Housing was not reported as a separate item; probably included under household operation.

<sup>23</sup> Includes family share of purchase price of gasoline engines and motors.

<sup>24</sup> Personal care included under clothing instead of under other.

<sup>25</sup> Equipment included under household operation instead of being shown separately.

<sup>26</sup> Tobacco and unitemized personal expenditures included under education, reading, recreation instead of under other.

<sup>27</sup> Includes some families that were F. S. A. borrowers.

<sup>28</sup> Expenditures for family events are included under gifts, welfare, selected taxes instead of being itemized by goods and services.

<sup>29</sup> Vacation expenses included under education, reading, recreation instead of being itemized by goods and services.

<sup>30</sup> Includes some expenditures for transportation.

<sup>31</sup> Rent and taxes on family home included under housing.

<sup>32</sup> Housing and furnishings and equipment included under household operation instead of being shown separately.

<sup>33</sup> Gifts and welfare included under education, reading, recreation.

<sup>34</sup> Includes life insurance.

<sup>35</sup> Housing and household operation are not shown separately; probably included under furnishings and equipment.

<sup>36</sup> Education, reading, and recreation and gifts, welfare, and selected taxes are not shown separately; probably included under other.

<sup>37</sup> Farm-furnished fuel included under farm-furnished food instead of being shown separately.

<sup>38</sup> Averages are based on a larger number of families than those giving expenditure details.

<sup>39</sup> Personal expenditures are included under medical care instead of under other.

Bureau of Home Economics.

TABLE 731.—*Farm-to-retail price spreads for 58 foods: Estimated retail value and equivalent farm value of quantities of food purchased annually by a typical American workingman's family, 1913-41*

| Year     | Farm value     | Retail value   | Margin         | Farm value as percentage of retail value | Index of hourly earnings of wage workers (1926=100) | Year     | Farm value     | Retail value   | Margin         | Farm value as percentage of retail value | Index of hourly earnings of wage workers (1926=100) |
|----------|----------------|----------------|----------------|--|---|----------|----------------|----------------|----------------|--|---|
|          | <i>Dollars</i> | <i>Dollars</i> | <i>Dollars</i> | <i>Percent</i>                           |   |          | <i>Dollars</i> | <i>Dollars</i> | <i>Dollars</i> | <i>Percent</i>                           |   |

Bureau of Agricultural Economics.

Estimates of annual purchases of foods by a typical workingman's family were obtained from the 1918-19 Cost of Living Survey made by the U. S. Bureau of Labor Statistics. The 58 foods include meat, dairy and poultry products, bakery and cereal products, a number of fresh and canned fruits and vegetables, and several miscellaneous items.

No allowance is made for processing taxes on wheat, rye, rice, hogs, corn, peanuts, and sugar, which, on the quantities of these products included in annual family purchases, amounted to about \$2 in 1933, \$10 in 1934, and \$11 in 1935.

Retail price data are from the U. S. Bureau of Labor Statistics; farm price data are principally those estimated by the Agricultural Marketing Service.

The index of hourly earnings excludes agricultural workers and was published through 1935 by the U. S. Bureau of Labor Statistics. Since 1936 the indexes are estimated from hourly earnings in selected industries. Labor costs constitute a substantial portion of marketing charges included in the margin.

TABLE 732.—*Food products: Estimated per capita consumption in terms of retail purchase weights, United States, 5-year averages, 1921-22 to 1940-41, annual 1936-37 to 1940-41*<sup>1</sup>

| Total, all foods <sup>15</sup> .....        | 1,354.9                  | 1,374.7                  | 1,334.5                  | 1,411.0                  | 1,343.4 | 1,415.2 | 1,404.6 | 1,430.0 | 1,459.2              |

<sup>1</sup> Consumption of foodstuffs in terms of estimated weight available for sale in retail markets, calculated from available statistics of production, exports, imports, shipments to territories, changes in stocks, disposition, and estimated average losses in transportation, processing, and marketing. The nature and extent of losses varies for individual commodities. For products retailed in essentially their manufactured form, such as manufactured dairy products and flour, processing ratios are calculated but losses of the manufactured product are negligible; for fluid milk a wastage factor and for eggs a breakage factor is allowed; for meats shrinkage and cutting losses occur between reported dressed weight and weights at retail; and for most fresh fruits and vegetables spoilage and wastage losses of substantial size take place.

For all crop products the year is the standard crop year beginning in the summer or fall of the first year shown in the column heading; for all livestock products the year is the calendar year succeeding. Per capita calculations are based on population of continental United States, except that vegetables for fresh use are in terms of per capita of urban population, since farm-garden production is not included. Products are grouped according to nutritional classes. All estimates are subject to revision.

<sup>2</sup> Preliminary estimates.

<sup>3</sup> Urban and farm consumption of fluid milk and cream, milk-equivalent weight.

<sup>4</sup> Includes all cheese except cottage, pot, and bakers'; condensed and evaporated milk, and ice cream.

<sup>5</sup> Total of the meats shown, plus fish estimated at 14 pounds per capita.

<sup>6</sup> Includes consumption from nonfarm production. Eggs calculated at 24 ounces per dozen.

<sup>7</sup> Not available.

<sup>8</sup> Includes canned beans, dry-weight equivalent.

<sup>9</sup> Detailed data are given in tables 423, 424, 426, and 427.

<sup>10</sup> Includes canned pulp and juice.

<sup>11</sup> Includes asparagus, artichokes, cabbage, carrots, kale, lettuce, peas, peppers, pimientos, pumpkin and squash, sauerkraut, snap beans, and spinach, detailed data for which are given in tables 426 and 427.

<sup>12</sup> Includes beets, cauliflower, celery, sweet corn, cucumbers, eggplant, lima beans, and onions, detailed data for which are given in tables 426 and 427.

<sup>13</sup> Includes all deciduous fruits, detailed data for which are given in tables 423 to 425, and all melons.

<sup>14</sup> Lard compounds, margarine, mayonnaise, and salad oils.

<sup>15</sup> Total of the foods shown, excluding the difference between actual weight of cream consumed and its milk-equivalent weight (estimated at 20 percent of total fluid milk and cream), and excluding the quantity of sugar duplicated in ice cream and canned fruits, estimated at 10 percent of sugar consumption.

Bureau of Agricultural Economics.

TABLE 733.—*Index numbers of the volume of agricultural production for sale and for consumption in the farm home, 1909-41*

(1935-39=100)

<sup>1</sup> Includes tobacco, sugar crops, hay, peanuts, soybeans, cowpeas, hops, and legume and grass seeds, in addition to crops in group index numbers.

<sup>2</sup> Also includes wool and mohair.

<sup>3</sup> Preliminary.

Bureau of Agricultural Economics.

NOTE.—This is an entirely revised series of index numbers; numerous additional commodities have been included and the base period has been changed to 1935-39, as compared with a base period of 1924-29 in table 677 of the 1941 Agricultural Statistics and similar tables in earlier editions of that book.

<sup>1</sup> Estimates corrected to July 1942.<sup>2</sup> Includes rental and benefit, soil conservation, agricultural adjustment program, price parity, and Sugar Act payments.<sup>3</sup> Total of columns 3 and 4.<sup>4</sup> Includes value of products consumed by farm laborers and their families, as well as by the operator's own household.<sup>5</sup> Includes an allowance for maintenance and interest on the value of farm dwellings and for a proportionate share of taxes on farm real estate and insurance on farm buildings. In most years the computed rent amounts to from 9 to 11 percent of the estimated value of farm dwellings.<sup>6</sup> Includes the cash income from farm marketings, Government payments, value of products consumed on farms where produced, and the computed rent of farm dwellings (columns 7 and 8).<sup>7</sup> Includes Government payments since 1933; for number of farms see table 701 in this book and table 685 in Agricultural Statistics, 1941.<sup>8</sup> Preliminary.

Bureau of Agricultural Economics.

<sup>1</sup> Estimates corrected to July 1942.<sup>2</sup> Includes expenditures for gasoline, oil, tires, and labor for repairing tractors, and gasoline, oil, tires, replacement parts, labor for repairs, registration fees, and insurance for automobiles and trucks. Only 40 percent of the total operating costs of automobiles is included as a production expense.<sup>3</sup> Includes expenditures for horses and mules, insecticides, containers, twine, ginning, seeds and nursery stock, miscellaneous expenditures for operation of greenhouses and nurseries, electricity for production, gasoline, oil, and repairs for operating stationary gasoline and steam engines, grazing fees, irrigation charges, fire, windstorm, hail, and crop insurance, veterinary services and medicines, blacksmithing, miscellaneous dairy supplies, miscellaneous hardware supplies, short-term interest, and tolls for boiling down sugar cane sirup and sorghum sirup.<sup>4</sup> Does not include expenditures for building materials, new farm machinery or repair parts, other farm equipment, wages of hired farm labor, taxes, farm-mortgage interest, or rent. This is the total of columns 1, 2, 3, 4, and 5.<sup>5</sup> Estimated total amount which would need to be spent annually by farmers for labor and materials in order to maintain the condition of buildings, machinery, and equipment on farms at the beginning of the year in a constant state of repair.<sup>6</sup> Cash wages to hired farm labor for farm work and the value of perquisites supplied to farm laborers.<sup>7</sup> Includes taxes levied against farm real estate and farm personal property.<sup>8</sup> Interest charges payable during the calendar year on outstanding farm-mortgage debt.<sup>9</sup> Gross rent paid to nonfarm landlords minus the expenses of agricultural production charged against them.<sup>10</sup> Preliminary.

Bureau of Agricultural Economics.

<sup>1</sup> Estimates corrected to July 1942.<sup>2</sup> An adjustment to gross income for sales out of inventory or for the net addition to inventories from production during the year. Computed by valuing changes in the numbers of livestock on farms and in the quantities of crops held for sale from one Jan. 1 to the next by prices at the end of the year.<sup>3</sup> Column 1 minus column 2, plus column 3.<sup>4</sup> Cash wages to hired labor for regular farm work and value of perquisites supplied to laborers, distributed according to place of residence.<sup>5</sup> Includes net income of farm operators from farming and farm wages to farm laborers living on farms (total of columns 4 and 5).<sup>6</sup> From column 10, table 735.<sup>7</sup> From column 11, table 735.<sup>8</sup> Includes net income to persons on farms from farming and other income from agriculture (column 6 plus column 10).<sup>9</sup> Preliminary

Bureau of Agricultural Economics.

<sup>1</sup> Estimates corrected to July 1942.<sup>2</sup> Estimates for 1929-41 prepared from income estimates of the Department of Commerce; earlier years from estimates of income by National Bureau of Economic Research. Original data were adjusted to be comparable throughout, and minor adjustments were made in estimates of nonagricultural income so that the method of computation and sources of income included would be more nearly in agreement with those used in estimating agriculture's contribution to the national income.<sup>3</sup> Column 6, table 736.<sup>4</sup> The income of the nonfarm population as shown here is national income minus the net income of persons on farms from farming (column 1 minus column 2). It is too large to the extent that persons on farms receive some income from nonagricultural sources. No data are available for the construction of reliable annual estimates of nonagricultural income received by persons on farms.<sup>5</sup> The population on farms includes all persons enumerated on farms in the taking of the census, whether or not they are engaged in farming, and adjusted to Jan. 1 in the years when the census was not taken as of Jan. 1. Estimates for the intercensal years were made by the Department of Agriculture.<sup>6</sup> Total estimated population Jan. 1, less the estimated farm population. Estimates of total population for 1910-29 were prepared by P. K. Whelpton Scripps Foundation for Research in Population Problems. Estimates for 1930-41 are by the Bureau of the Census.<sup>7</sup> Obtained by dividing the index number of income per person on farms from farming by the index number of income per person not on farms. This provides a measure of the relation of the net income of individuals on farms from farm operations to the income of individuals not on farms, as specified in the Agricultural Adjustment Act of 1938.<sup>8</sup> Preliminary.

Bureau of Agricultural Economics.

TABLE 738.—Cash farm income and value of products consumed on farms where produced, United States, by commodities, 1938-41<sup>1</sup>

<sup>1</sup> Estimates of cash farm income measure the amount of money received by farmers during the calendar year from the sale of the different farm products. Commodities used for human consumption on the farms where grown are valued at the average price received by farmers for the commodities sold.

<sup>2</sup> Preliminary.

<sup>3</sup> Includes all berries except cranberries and straw berries.

<sup>4</sup> Includes dates, kumquats, loquats, nectarines, papayas, pomegranates, prickly pears, and quinces as well as apricots, apples, avocados, cherries, figs, grapes, lemons, limes, olives, prunes, plums, and pears in noncommercial States.

<sup>5</sup> Includes income from commercial truck crops for fresh market and cash returns from market and farm stands.

<sup>7</sup> Includes broomcorn, crimson clover seed, popcorn, peppermint, and forest, nursery and greenhouse products.

<sup>8</sup> Cash income includes value of broilers consumed in households of producers, which is less than 1 percent of total production.

<sup>9</sup> Includes ducks, geese, and guineas.

<sup>10</sup> Value of dairy products consumed on farms is not available for separate items; total value is determined by applying milk-equivalent price received for products sold to total milk consumed on farms.

<sup>11</sup> Includes honey, horses, mules, and molar.

<sup>12</sup> Includes agricultural conservation, Sugar Act, and price-adjustment payments.

TABLE 739.—*Cash farm income, value of products consumed on farms where produced, and Government payments, by States, 1940 and 1941*

| Year and State      | Cash income from farm marketings |                                  |            | Government payments | Cash income from marketings and Government payments | Value of products consumed on farms where produced | Cash income from marketings, value of products consumed on farms where produced, and Government payments |

Bureau of Agricultural Economics. The reports are those tabulated in table 742. Distribution by geographic divisions in earlier years is shown in 1935 Yearbook, table 67; 1937 Agricultural Statistics, table 494; 1939 Agricultural Statistics, table 629; and 1941 Agricultural Statistics, table 707.

<sup>1</sup> Receipts for the years from 1934 to 1940 inclusive include rental and benefit payments received from Agricultural Adjustment Administration. The sums were roughly divided between crops and livestock from 1934 to 1936; all placed in miscellaneous from 1937 to 1940. The average amounts from 1934 to 1940 were, respectively: United States, \$109; North Atlantic, \$41, \$44; East North Central, \$153, \$141; West North Central, \$286, \$220; South Atlantic, \$101, \$80; South Central, \$164, \$141; and Western, \$144, \$133.

<sup>2</sup> Minus sign (-) shows decrease.  
<sup>3</sup> Average for farms that reported the item.

Bureau of Agricultural Economics. Compiled from reports of individual farms. Division averages for 1932 and 1933 in 1935 Yearbook, table 466; 1934 and 1935, in 1937 Agricultural Statistics, table 493; 1936 and 1937 in 1939 Agricultural Statistics, table 629; and 1938 in 1941 Agricultural Statistics, table 706.

<sup>1</sup> Preliminary estimates. States grouped mainly on production practices and yields. In computing averages, data were weighted by acreage harvested.

<sup>2</sup> Includes hauling and spreading manure.

<sup>3</sup> Includes threshing for wheat and oats.

<sup>4</sup> Includes charges for water for irrigation, twine and sacks, crop insurance, use of implements, use of storage buildings, overhead, including a small amount of miscellaneous labor, and a charge for expenses incurred on acreage abandoned because of crop failure.

<sup>5</sup> Includes a charge for rent on the acreage not harvested because of crop failure.

<sup>6</sup> Estimated costs in 1940 if yields and acre abandonment had been the average of 1930-39. The average United States yield per acre harvested 1930-39 was for corn 24.2 bushels, for wheat, 13.3 bushels, and for oats, 27.3 bushels.

<sup>7</sup> Includes the 6 New England States and New York. New Jersey, Pennsylvania, Delaware, Maryland, Virginia, West Virginia, Kentucky, and Tennessee.

<sup>8</sup> Includes the States of North Carolina, South Carolina, Georgia, Florida, Alabama, and Mississippi.

<sup>9</sup> Includes the States of Arkansas, Louisiana, Oklahoma, and Texas.

<sup>10</sup> Includes the States of Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah, Nevada, Washington, Oregon, and California.

<sup>11</sup> Includes the 6 New England States and New York. New Jersey, Pennsylvania, Delaware, Maryland, Virginia, West Virginia, and Kentucky.

<sup>12</sup> Includes the States of North Carolina, South Carolina, Georgia, Tennessee, Alabama, and Arkansas.

<sup>13</sup> Includes the States of Idaho, New Mexico, Arizona, Utah, Nevada, Washington, Oregon, and California.

Bureau of Agricultural Economics.

- <sup>1</sup> Preliminary estimates. In computing averages, data were weighted by acreage harvested.
- <sup>2</sup> Obtained by dividing the production of lint in terms of 500-pound gross-weight bales by the acreage harvested.
- <sup>3</sup> Includes hauling and spreading manure.
- <sup>4</sup> Includes picking and snapping cotton, hauling to gin, and hauling lint and cottonseed to local markets.
- <sup>5</sup> Includes miscellaneous labor, irrigation (including water), dusting, picking sacks and sheets, crop insurance, use of implements, use of storage buildings, overhead, and a charge for expenses incurred on acreage abandoned because of crop failure.
- <sup>6</sup> Includes a charge for rent on the acreage not harvested because of crop failure.
- <sup>7</sup> Estimated cost in 1940 if cotton yield and acreage abandonment had been the average of 1930-39. The average United States yield per acre harvested in 1930-39 was 215 pounds of lint (gross weight).
- <sup>8</sup> Includes the lower and upper coastal plain of Virginia, North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi, Louisiana, and the black prairie belt of Alabama and Mississippi.
- <sup>9</sup> Includes the rolling and hilly uplands of Virginia, North Carolina, South Carolina,

Georgia, and Alabama, which border the Blue Ridge Mountains on the east and south. <sup>10</sup> Include Tennessee exclusive of Lake County, the hilly cotton lands of northern Mississippi, northern Alabama, and northern Georgia, and western North Carolina.

<sup>11</sup> Include the principal bottom lands of the Mississippi, the Arkansas, and the Red Rivers.

<sup>12</sup> Include the hilly lands of Arkansas, Louisiana, southern Missouri, eastern Texas, and eastern Oklahoma.

<sup>13</sup> Include the Gulf coast prairie of Texas and Louisiana, and the black waxy prairie of Texas.

<sup>14</sup> Include the dry-land areas of western Oklahoma, western Texas, and eastern New Mexico.

<sup>15</sup> Include the irrigated cotton lands of California, Arizona, New Mexico, and Texas. <sup>16</sup> Include the 16 States of Virginia, North Carolina, South Carolina, Georgia, Florida, Alabama, Tennessee, Mississippi, Louisiana, Arkansas, Missouri, Oklahoma, Texas, New Mexico, Arizona, and California, which produced 99.9 percent of the United States cotton crop of 1940.

Bureau of Agricultural Economics.

<sup>1</sup> Figures for years 1925-29 include motor cultivators, not reported 1930 and thereafter.<sup>2</sup> Percent of all farm wheel tractors with rubber tires: 1935, 14; 1936, 35; 1937, 43; 1938, 68; 1939, 85; 1940, 90; 1941, 95.<sup>3</sup> Export and domestic sales combined.<sup>4</sup> Census was not taken.<sup>5</sup> Includes number of tractors exported.

Bureau of Agricultural Chemistry and Engineering. Compiled as follows: 1920 data collected by Department of Agriculture (U. S. Department of Agriculture Circular No. 212); 1921-41 data collected by U. S. Department of Commerce. Census reports give number of tractors on farms in the United States as follows: 1920, 246,083; 1925, 505,933; 1930, 920,021; 1940, 1,567,430. Tractor data for earlier years in Agricultural Statistics, 1941, table 694.

<sup>1</sup> Preliminary.

Bureau of Agricultural Economics.

Tractor numbers 1910-34 and tractor purchases 1910-39 estimated from the Bureau's report on Income Parity for Agriculture, part II, sec. 3, Aug. 1940. Purchases for 1940 and 1941 estimated from reports of the Census of Manufactures. Tractor numbers 1935-41 based on estimated annual purchases and annual discards of tractors by farmers, adjusted to tractor numbers reported by the Bureau of the Census, April 1940.

TABLE 750.—*Tractors on farms: Number, by type, and proportion of wheel tractors having rubber tires, by geographic divisions, Jan. 1, 1941*

| Geographic division     | All tractors on farms <sup>1</sup> | Percentage that were <sup>2</sup> — |                |                  |                  |                  | Wheel tractors on farms | Percentage equipped with <sup>2</sup> — |                         |                        |                 |

<sup>1</sup> Horsepower ratings were based on tests of the Nebraska Experiment Station when available. Other wise manufacturer's ratings were used.

<sup>2</sup> Includes general-purpose, standard-wheel, and track-laying tractors. Home-made and garden-type tractors not included.

Bureau of Agricultural Economics. From report on Farm Tractors, Type, Size, Age, and Life, Feb. 1942

| Sulfur.....   | 269, 517                 | 225, 336                 | 335, 819                 | -----                    |

<sup>1</sup> Basis 16 percent available phosphoric acid.<sup>4</sup> Included in other nitrogenous materials.<sup>2</sup> Basis 50 percent K<sub>2</sub>O.<sup>5</sup> Basis 50° Baumé.<sup>3</sup> Basis 20 percent K<sub>2</sub>O.

Bureau of Agricultural Economics. Compiled from the biennial reports of Census of Manufactures.

NOTE.—In addition to the materials listed above, there was also used in the manufacture of fertilizers in 1939 about 45,145 tons of cal nitro and 119,754 tons of phosphoric acid.

<sup>1</sup> Preliminary.<sup>2</sup> Obtained from coke-oven operations, excluding screenings and breeze.<sup>3</sup> Ammonia liquor NH<sub>3</sub> content converted to sulfate equivalent included.<sup>4</sup> Reported by fertilizer manufacturers.<sup>5</sup> Bulk superphosphate. Superphosphates in wet base and wet mixed goods excluded.<sup>6</sup> Total of standard not over 20 percent P<sub>2</sub>O<sub>5</sub> content and treble over 20 percent P<sub>2</sub>O<sub>5</sub> content, beginning 1935.<sup>7</sup> Includes ashes, wood, and beet root.<sup>8</sup> Includes kainit, manure salts, muriate and sulfate of potash, sulfate of potash-magnesia, crude nitrate of potash, and other potash-bearing substances.

Bureau of Agricultural Economics. Compiled as follows: Production and sales, sulfate of ammonia and potash from reports of the Bureau of Mines; sulfuric acid and superphosphate from reports of the Bureau of the Census; imports and exports from Foreign Commerce and Navigation of the United States.

<sup>1</sup> Preliminary.<sup>2</sup> Byproduct from the mining of copper, lead, and iron ores. Bureau of Mines.<sup>3</sup> Sales by producers. Bureau of Mines.<sup>4</sup> Produced for sale. Bureau of the Census.<sup>5</sup> Includes London purple.<sup>6</sup> Copper industry only; Bureau of Mines. The production for sale as reported by the Bureau of the Census was as follows: 1933, 56,070,199 pounds; 1935, 54,759,439 pounds; 1937, 78,892,091 pounds; 1939, 68,161,761 pounds.<sup>7</sup> Nicotine sulfate and other tobacco extracts.<sup>8</sup> Not available.<sup>9</sup> Reported by Bureau of the Census beginning 1939.<sup>10</sup> Produced from derris root, cubé, timbo, barbasco, etc.

Bureau of Agricultural Economics. Production and sales compiled from reports of Bureau of Mines and Bureau of the Census, as indicated by footnotes; imports and exports compiled from Foreign Commerce and Navigation of the United States.

<sup>1</sup> Levies rather than payments are shown for property taxes because data for payments are not available for many States. For the country as a whole levies and payments probably are about equal over long periods.<sup>2</sup> Includes taxes levied against motor vehicles under general property tax laws.<sup>3</sup> For amounts paid by all users, see table 769.<sup>4</sup> State taxation of motor fuel began in 1919, Federal taxation in 1932<sup>5</sup> 1910-14 average.<sup>6</sup> Preliminary.

Bureau of Agricultural Economics.

<sup>1</sup> Contract rates, except on Federal land bank loans since May 12, 1933, and Land Bank Commissioner loans since July 22, 1937, which are included at temporarily reduced rates authorized by Emergency Farm Mortgage Act of 1933 and subsequent legislation. Rates subsequent to 1936 for lenders other than Federal land banks and Land Bank Commissioner were assumed to be the same as those on Jan. 1, 1936.

<sup>1</sup> Farm Credit Administration.<sup>2</sup> In computing rates, each farm credit district is given equal weight, but within each district rates are weighted by number of days in force.<sup>3</sup> Contract rates on loans through national farm loan associations. Temporarily reduced rate in effect between July 11, 1933, and June 30, 1935, was 4.5 percent, and since July 1, 1935, 3.5 percent.<sup>4</sup> Based on bonds outstanding on Dec. 31 each year.<sup>5</sup> From 1920 through 1925, yields are based on semiannual averages of the daily yields on all issues of Federal land bank bonds. Beginning in 1926, yields are based on average of daily yields on asked prices of long-term issues, excluding bonds callable in 5 years or less.<sup>6</sup> Contract rate. Temporarily reduced rate in effect between July 22, 1937, and June 30, 1940, was 4.0 percent, and since July 1, 1940, 3.5 percent.<sup>7</sup> Average of daily yields.<sup>8</sup> Loan rates were slightly lower than discount rates during years 1924-30.<sup>9</sup> Based on debentures issued during the year.<sup>10</sup> Board of Governors of Federal Reserve System.<sup>11</sup> Prevailing open-market rates in New York City.<sup>12</sup> Revised.<sup>13</sup> All outstanding bonds were callable in 5 years or less.

Bureau of Agricultural Economics.

TABLE 773.—*Farm-mortgage debt: Number of mortgaged farms, Jan. 1, 1930 and 1935, and amount of farm-mortgage debt, Jan. 1, 1930, 1935, and 1937-41, by States*

| State and division          | Mortgaged farms |               | Amount of farm-mortgage debt <sup>1</sup> |                      |                      |                      |                      |                      |                      |

<sup>1</sup> Loans to farmers' cooperative associations are included in loans of Federal agencies shown here. Except for insignificant amounts, real estate loans and all loans outside continental United States are excluded.

<sup>2</sup> Excluding loans to and discounts for production credit associations, regional agricultural credit corporations, and banks for cooperatives.

<sup>3</sup> Loans made, as reported for these agencies, include loans renewed.

<sup>4</sup> Including production credit associations in liquidation. Of the 538 associations at the close of 1941, 8 were in liquidation.

<sup>5</sup> In liquidation since Apr. 30, 1934.

<sup>6</sup> Lending operations curtailed following the establishment of the banks for cooperatives that were created under the Farm Credit Act of 1933.

<sup>7</sup> Including drought-relief loans.

<sup>8</sup> Rehabilitation loans to individuals, loans to cooperatives, and Defense Relocation Corporations, including loans made from State rural rehabilitation corporation funds and by Resettlement Administration. A minor part estimated for early years.

<sup>9</sup> Principally loans to farm electrification cooperatives but also includes loans to public bodies and to private utilities for rural electrification.

<sup>10</sup> Excludes loans outstanding under guaranties of the Commodity Credit Corporation; includes amounts disbursed by C. C. C. for warehousing expenses and miscellaneous costs. Loans made during year represent the cash disbursements for direct loans, for the purchase of guaranteed loans from lending agencies, and for care and preservation of collateral. This series is not comparable to "loans made" in tables 800 and 801; the latter include guaranteed loans made by banks but not purchased by Commodity Credit Corporation. Does not include commodities purchased, such as tobacco.

<sup>11</sup> Data unavailable.

<sup>12</sup> June 30.

<sup>13</sup> Estimate for all open State and national banks.

<sup>14</sup> Estimate for all open State and national banks as of June 30, 1931.

<sup>15</sup> Revised.

Bureau of Agricultural Economics.

<sup>1</sup> Includes loans to farmers' cooperative organizations by Federal agencies and includes an insignificant amount of loans carrying real estate security. State distribution of Commodity Credit Corporation loans unavailable.

<sup>2</sup> Loans classified by location of bank rather than location of borrower.

<sup>3</sup> Excludes loans to and discounts for production credit associations, regional agricultural credit corporations, and banks for cooperatives.

<sup>4</sup> 538 production credit associations, of which 8 were in liquidation.

<sup>5</sup> In liquidation since Apr. 30, 1934.

<sup>6</sup> Includes drought relief loans. Total shown includes \$39,000 which cannot be allocated by States.

<sup>7</sup> Lending operations curtailed, following the establishment of the banks for cooperatives that were created under the Farm Credit Act of 1933.

Rehabilitation loans to individuals, loans to cooperatives and Defense Relocation Corporations, including loans made from State rural rehabilitation corporation funds and by Resettlement Administration.

<sup>9</sup> Principally loans to farm electrification cooperatives but also includes loans to public bodies and to private utilities for rural electrification. These figures show total amounts advanced. Amounts outstanding not available by States, but total Jan. 1, 1942, was \$322,509,000.

<sup>10</sup> Less than \$500.

Bureau of Agricultural Economics.

<sup>1</sup> Loans outside continental United States are excluded.<sup>2</sup> Data for loans made by these agencies include loans renewed.<sup>3</sup> Approximately 85 percent of individuals served by these cooperatives are farmers.<sup>4</sup> Includes loans from State rural rehabilitation corporation funds and by Resettlement Administration. Does not include loans to participate in cooperatives.<sup>5</sup> In addition to these loans made directly to cooperative organizations, cotton loans to individuals, amounting to \$23,642,000, were held by cooperatives on Jan. 1, 1942, under purchase contracts with the Commodity Credit Corporation.

Bureau of Agricultural Economics.

TABLE 779.—*Loans to farmers' cooperative organizations: Loans made during 1941 and loans outstanding Jan. 1, 1942, by selected lender groups, by States*<sup>1</sup>

<sup>1</sup> Loans made to cooperative associations are shown by States according to location of association and not according to location of members benefiting from the loans.

<sup>2</sup> Loans made, as reported for these agencies, include loans renewed.

<sup>3</sup> Lending operations curtailed following the establishment of the banks for cooperatives.

<sup>4</sup> Approximately 85 percent of individuals served by these cooperatives are farmers.

<sup>5</sup> In addition to these loans made directly to cooperative organizations, the Commodity Credit Corporation during 1941 guaranteed cotton loans to individuals by cooperative organizations in the amount of \$23,921,000, of which \$23,642,000 was outstanding on Jan. 1, 1942.

<sup>6</sup> Total amounts advanced. Amounts outstanding not available by States, but total Jan. 1, 1942, was \$304,807,000.

<sup>7</sup> Amounts of Commodity Credit Corporation loans to cooperatives outstanding on Jan. 1, 1942, were as follows: Virginia, \$17,000; Georgia, \$8,136,000; Kentucky, \$1,343,000; Tennessee, \$1,400,000; California, \$3,474,000.

<sup>1</sup> These figures exclude all Puerto Rico loans made and outstanding.<sup>2</sup> Privately capitalized financing institutions.

Farm Credit Administration.

Footnotes for table 793:

<sup>1</sup> Operating insured commercial banks only. Carried in some previous issues of this book as "Personal and collateral loans to farmers." Loans classified by location of bank and not strictly comparable by States with data for other lenders, which are classified by location of borrower.<sup>2</sup> Revised.<sup>3</sup> Hawaii, Alaska, and Virgin Islands.

Bureau of Agricultural Economics. Based on reports to the Comptroller of the Currency, the Board of Governors of the Federal Reserve System, and the Federal Deposit Insurance Corporation.

TABLE 795.—*Production credit associations: Loans outstanding on specified dates, by States, 1939-42*<sup>1</sup>

See footnotes on next page.

## Footnotes for table 800:

<sup>1</sup> Renewals and extension of loans previously made are excluded. Loans and purchases include: (1) Loans made directly by the Corporation, (2) guaranteed loans made by banks and other lending agencies, and (3) amounts advanced to purchase commodities for the account of the Corporation. These are face amounts only. Storage and transportation advances are excluded except for "Other commodity purchases." See footnote 17.

<sup>2</sup> Book values of outstanding loans held by banks and other lending agencies are face amounts only. Loans held by the Corporation include face amounts and all charges paid. Unpaid accrued charges are excluded.

<sup>3</sup> In addition to the commodities listed in this table, the Commodity Credit Corporation on Jan. 1, 1942, owned 90,505 long tons of rubber, with a book value of \$34,498,497, delivered to the Corporation in accordance with the terms of the cotton-rubber barter deal with the United Kingdom.

<sup>4</sup> Book value of commodities owned includes unpaid accrued charges.

<sup>5</sup> Loans to the Cotton Producers Pool were second-lien advances on cotton in the pool. The 1933 advance was \$20 per 500-pound bale and the 1934 advance was an additional \$10 on cotton remaining in the pool. The number of bales involved is excluded from the quantities placed under loan.

<sup>6</sup> Less than 500.

<sup>7</sup> In the 1941 cotton program, all producers' notes except those held by cooperative marketing associations have been placed in a pool. Certificates of participation in this pool have been issued to the banks and other lending agencies making loans. On Jan. 1, 1942, banks and other lending agencies held such certificates in the amount of \$86,282,700, with the Corporation holding the remainder. See footnote 8.

<sup>8</sup> Held by cooperative marketing associations, only. See footnote 7.

<sup>9</sup> Partly estimated.

<sup>10</sup> Loans in litigation.

<sup>11</sup> Includes corn of the 1937, 1938, 1939, and 1940 crops.

<sup>12</sup> Dry weight.

<sup>13</sup> Green weight.

<sup>14</sup> Includes 914,000 pounds green weight and 110,000 pounds dry weight.

<sup>15</sup> Collateral overstated; repayments of loans have been received but collateral under trust receipts had not been released by Jan. 1, 1942.

<sup>16</sup> Includes purchases of Austrian peas, hairy vetch, crimson clover, and ryegrass seed for use as seed for winter cover crops.

<sup>17</sup> Represents expenditures for the purchase, handling, and transportation of commodities, principally foodstuffs, bought for lease-lend operations or domestic distribution.

Commodity Credit Corporation.

<sup>1</sup> Renewals and extensions of loans previously made are excluded. Loans and purchases include: (1) Loans made directly by the Commodity Credit Corporation, (2) guaranteed loans made by banks and other lending agencies, and (3) amounts advanced to purchase commodities for the account of the Corporation. These are face amounts only; storage advances are excluded. As far as possible loans have been distributed according to the location of producers receiving the loans. Guaranteed loans made by cooperatives to producers in the 1940-41 and 1941-42 cotton programs have been distributed according to the location of the producer receiving the loan. Direct loans to cooperatives have been distributed according to the location of the association.

<sup>2</sup> Represents tobacco bought for the account of Commodity Credit Corporation under repurchase options granted to export companies, plus loans to tobacco exporters. Loans to tobacco cooperatives have been distributed by States.

<sup>3</sup> Represents expenditures for the purchase, handling, and transportation of commodities, principally foodstuffs, bought for lease-lend operations or domestic distribution.

<sup>4</sup> Seed-purchase programs.

<sup>5</sup> Includes the 1933 cotton loans of \$99,498,000 for which State data are not available.

<sup>6</sup> Includes \$7,980,000 advanced to producers in the fall of 1938, when an estimated 14,000,000 bushels of 1937 corn were placed under loan.

Commodity Credit Corporation.

<sup>1</sup> Edison Electric Institute, Stat. Bul. No. 4.<sup>2</sup> Data from R. E. A. surveys. Number of farms as of Apr. 1, 1940, used as a base in computing percentage of farms electrified.<sup>3</sup> Data shown are affected by reclassification of "farms" in line with census definitions, by consolidation of farms, by abandonment of farms to other uses, such as urban subdivisions, public parks, etc., and by the fact that Edison Electric Institute figures on farms receiving central-station service tend, in most States, to exceed those shown by R. E. A. surveys. As a result of these factors the increase in farms electrified is conservative and in certain instances is appreciably understated.

Rural Electrification Administration.

<sup>1</sup> Acquired by foreclosure or other "distress" transfers from borrowers. Excludes Territories and possessions of United States.

<sup>2</sup> Investment. Includes sheriffs' certificates and judgments, but excludes prior liens.

<sup>3</sup> Investment, partially estimated. Includes real estate under contract of sale.

<sup>4</sup> Carrying value of real estate, including sheriffs' certificates and judgments. Real estate held by banks in receivership is included at book value.

<sup>5</sup> Book value. Data available only since 1936 and represent holdings of insured commercial banks.

<sup>6</sup> Investment. Rural Credit Board of South Dakota, Bank of North Dakota, and Department of Rural Credit of Minnesota.

<sup>7</sup> Data unavailable.

<sup>8</sup> Revised.

<sup>9</sup> Amount held on June 30.

Bureau of Agricultural Economics.

<sup>1</sup> Number of companies for which data could be obtained. Variations from year to year in this column may not represent real variations in the number of companies operating.

<sup>2</sup> Excess of assets over liabilities. Farm mutuals, as assessment companies, not required to set up unearned premium reserves. Data not compiled prior to 1935.

Farm Credit Administration. Data for 1934 and later years are from Farm Credit Administration and include companies with more than half of their insurance written on farm property. Earlier data are from Bureau of Agricultural Economics and include only companies which surveys indicated had more than 65 percent of their insurance on farm property. All data compiled from published State reports, supplemented by information from State insurance officials, officers of farmers' mutuals, and others.

<sup>1</sup> Based upon principal class of wheat grown.

<sup>2</sup> Premiums and indemnities are determined in bushels of wheat, although transactions may be made in the cash equivalent.

<sup>3</sup> Wheat acreage for farm as included in contract, although the insurance for the farm may cover interest of landlord, of tenant, or of both.

<sup>4</sup> Preliminary.

<sup>5</sup> Comparable to "number of contracts" in previous years.

Federal Crop Insurance Corporation.

1 Materials obtained by the Agricultural Adjustment Administration and advanced to farmers, the cost to be deducted from future agricultural conservation program payments.  
 2 Triple superphosphate furnished contained approximately 47% phosphoric acid.  
 3 Includes freight to destination.  
 4 Grasses and legumes to replace seedlings killed by 1939 drought.  
 5 \$340.  
 6 \$313.  
 7 Winter legumes.  
 8 \$476.  
 9 \$420.  
 Agricultural Adjustment Administration.

TABLE 818.—*Agricultural Adjustment Administration payments under the 1939 and 1940 conservation programs, assigned by farmers as collateral for production credit*

<sup>1</sup> Some work has been done in Massachusetts, New Hampshire, and Hawaii, but no operations projects have been set up there.

<sup>2</sup> Includes only those districts having signed both the basic memoranda of understanding with the Department of Agriculture and the supplemental memoranda of understanding for assistance with the Soil Conservation Service.

<sup>3</sup> Includes only those projects under S. C. S. management June 30, 1941. It does not include whole projects or parts of projects under State management, for which S. C. S. is custodian, nor projects transferred to other agencies.

<sup>4</sup> Includes only those camps active on June 30, 1941 (346 C. O. C. conservation camps, 32 C. C. C. drainage camps, 3 C. O. C. conservation camps.)

Soil Conservation Service.

TABLE 824.—*Soil and water losses under cultivation and protective cover, from 17 important soils representative of the principal types of erodible farm land within an area of approximately 260,000,000 acres*

<sup>1</sup> This summary does not include 734,999 acres in migratory waterfowl land-utilization projects, transferred to the Fish and Wildlife Service; 394,968 acres in recreation land-utilization projects, transferred to the National Park Service, or 971,879 acres in Indian land-utilization projects, transferred to the Office of Indian Affairs.

<sup>2</sup> Represents acreage acquired by transfer and purchase, including lands for which options to purchase have been accepted on behalf of the United States.

<sup>3</sup> Soil-conservation districts, grazing districts, and grazing associations.

<sup>4</sup> Represents acreages transferred to State agencies, for which the Soil Conservation Service maintains a custodial responsibility. Transfers of lands to State agencies are consummated by agreement whereby the United States retains title to the lands and exercises a custodial responsibility to assure appropriate management and protection.

<sup>1</sup> In each of the horizontal lines 1 to 9, inclusive, is shown the land-use acreage before planning and the uses to be made of that acreage after planning. The acreage figures shown in parentheses represent the amount of before-planning acreage to remain in its original use. In line 10 is shown the total acreage of all land-uses and the total to be in each land-use after planning. The figures in line 11 represent the difference (+ or -)

between the before-planning and after-planning acreage for each land-use. It will be observed that all the idle land (901,901 acres) has been put to use.

Soil Conservation Service.

1 Districts have depended almost entirely for assistance in developing farm and ranch conservation plans from the Soil Conservation Service, although some help has been received from other sources.

<sup>2</sup> Includes farm and ranch conservation plans in demonstration and watershed projects received from other sources.

a Approximately one-third of these plans were in conjunction with plans included under such as Bureau of Indian Affairs, Forest Service, Farm Security Administration, etc.

<sup>4</sup> In most cases the farm woodland undertakings are carried out in accordance with conservation plans for the entire farm or ranch; over half of these plans were prepared in conjunction with plans included under districts and demonstration projects.

<sup>e</sup> These figures include a duplication of approximately 1,700 plans, which are water facilities and farm forestry plans developed in conjunction with districts and demonstration projects.

on projects.

<sup>1</sup> For specific procedure for organization of Soil Conservation districts, reference should be made to each of the respective State Soil Conservation districts laws. By provisions of most district laws, the State Soil Conservation Committee has the responsibility (among others) for the organization of districts, as follows: Accepts petitions for the organization of districts, submitted by any 25 land occupiers; holds hearings and determines need for a district; defines district boundaries; holds referenda and determines whether district operations are administratively practicable and feasible, and appoints two local district supervisors. The two appointed supervisors obtain a certificate of organization from Secretary of State. Three additional supervisors are elected to complete the governing body of the district.

<sup>2</sup> Headings not appropriate to organizational steps under Soil Conservation districts laws of this State.

Soil Conservation Service.

TABLE 829.—*Soil Conservation districts: Approximate acreage, number of farms, and some activities and accomplishments, by States, cumulative to Dec. 31, 1941*<sup>1</sup>

| State               | Approximate acreage | Approximate number of farms in district | Conservation surveys | Farm conservation plans |              | District educational meetings |            | Method-result demonstrations |            |

<sup>1</sup> The preparation of soil maps by the Soil Survey Division, Bureau of Plant Industry, is generally done in cooperation with the State agricultural experiment stations.

<sup>2</sup> The number of square miles mapped is not necessarily a criterion of the amount of work involved, since ease of mapping varies from area to area.

<sup>3</sup> These figures refer to work done over a period of 40 years, and in some instances include resurveys.

<sup>4</sup> Inquiry for available maps and reports may be made of the State agricultural experiment stations or the U. S. Department of Agriculture. During the fiscal year 1941, maps were published for the following counties in the States indicated: *Alabama*: Sumter County. *Arizona*: Casa Grande area and Yuma Desert area. *California*: Visalia area. *Georgia*: Hall County. *Indiana*: Jennings and Steuben counties. *Iowa*: Audubon and Jackson counties. *Michigan*: Ingham County. *Minnesota*: Pine County. *Montana*: Middle Yellowstone Valley area. *Nebraska*: Cass County. *New York*: Ulster County. *North Carolina*: Clay County. *Oklahoma*: Pontotoc and Washita counties. *Texas*: Kaufman and Zavalla counties. *Virginia*: Isle of Wight County. *Wyoming*: Uinta County.

Bureau of Plant Industry.

<sup>1</sup> Headquarters for the United States Forest Service and its various regions are as follows:

National headquarters: United States Forest Service, Washington, D. C.

Regional headquarters:

Region 1. Northern region: Office, Federal Building, Missoula, Mont. Embracing Montana,

northeastern Washington, northern Idaho, and northwestern South Dakota.

Region 2. Rocky Mountain region: Office, Post Office Building, Denver, Colo. Embracing

Colorado, eastern Wyoming, South Dakota, and Nebraska.

Region 3. Southwest region: Office, Post Office Building, Albuquerque, N. Mex. Embrac-

ing Arizona and New Mexico.

Region 4. Intermountain region: Office, Forest Service Building Ogden, Utah. Embracing

Utah, southern Idaho, western Wyoming, and Nevada.

Region 5. California region: Office, Phelan Building, 760 Market St., San Francisco, Calif.

Embracing California and southwestern Nevada.

Region 6. North Pacific region: Office, Post Office Building, Portland, Oreg. Embracing

Washington and Oregon.

Region 7. Eastern region: Office, Bankers Securities Building, Philadelphia, Pa. Embracing

Kentucky, Maine, Maryland, Massachusetts, New Hampshire, Pennsylvania,

Vermont, Virginia, and West Virginia.

Region 8. Southern region: Office, Glenn Building, Atlanta, Ga. Embracing Alabama,

Arkansas, Florida, Georgia, Louisiana, Mississippi, North Carolina, Oklahoma,

Puerto Rico, South Carolina, Tennessee, and Texas.

Region 9. North Central region: Office, Madison Building, Milwaukee, Wis. Embracing

Illinois, Indiana, Iowa, Michigan, Minnesota, Missouri, North Dakota, Ohio, and

Wisconsin.

Forest Products Laboratory, Madison, Wis. (In cooperation with the University of

Wisconsin.)

Region 10. Alaska region: Office, Federal and Territorial Building, Juneau, Alaska. Embrac-

ing Alaska.

## Footnotes for Table 833—Continued.

<sup>1</sup> Definitions of units:

**National forests:** Areas established as national forests by Act of Congress or Presidential proclamation. Acreages shown as under Forest Service administration do not include land-utilization project lands or other areas over which the Forest Service has supervision, such lands being listed under the classification "Land-utilization and other areas."

**Purchase units:** Areas established by the Secretary of Agriculture with the concurrence of the National Forest Reservation Commission but not formalized by Act of Congress or Presidential proclamation. Acreages shown under Forest Service administration do not include land-utilization project lands or other areas over which the Forest Service has administration, such lands being listed under the classification "Land-utilization and other areas."

**Experimental areas:** Areas outside of the exterior boundaries of national forests or purchase units which have been reserved and dedicated to forest or range research and experimentation by Executive order or other authorized administrative action.

**Land-utilization and other areas:**

- a. **Land-utilization areas:** Lands acquired by the United States in pursuance of certain national programs of land-utilization and adjustment, which by order of the Secretary of Agriculture have been placed under the administration of the Forest Service but have not yet been given a national-forest status. Some of such lands are wholly or partially within the boundaries of national forests or purchase units, but their acreage is not shown as part of the national-forest or purchase-unit acreage. The figures for this classification are based upon the following definitions:

**Gross area:** That part of the project not included within the boundaries of a national forest, purchase unit, or experimental area.

**Area not under Forest Service administration:** The private, county or State lands within that part of the project that is outside of the boundaries of a national-forest, purchase-unit, or experimental area, less the acreage under Forest Service administration within such units.

**Area under Forest Service administration:** All lands within the project boundaries which have been acquired by the United States and placed under Forest Service administration, regardless of whether they are inside or outside of national-forest, purchase-unit, or experimental-area boundaries.

- b. **Other areas:** Fort Bayard Reservation, New Mexico, placed under the administration of the Forest Service by the Federal Works Agency. The figures for this area are based upon the same definitions as those for land-utilization areas and in the summaries are included with land-utilization areas.

<sup>2</sup> Acreages of small administrative sites outside of proclaimed boundaries and the 3 small shop sites in Montana, California, and Wisconsin are included.

<sup>4</sup> Acreages of small administrative sites outside of established boundaries are included. Does not include lands within certain State forests in Michigan, which have been acquired by the United States with intent to exchange them for State lands within the national forests. The Massabesic Experimental Forest in Maine and the McNeill Division of the Harrison Experimental Forest in Mississippi, which have both purchase-unit and experimental-forest status, are only included in the experimental-area summaries.

<sup>5</sup> Exclusive of 1,890 acres of the Beltsville Research Center of the Department of Agriculture, assigned to the Forest Service for use as an experimental area. The Massabesic Experimental Forest in Maine and the McNeill Division of the Harrison Experimental Forest in Mississippi, which have both purchase-unit and experimental-forest status, are only included in the experimental-area summaries.

Forest Service.

For the detail of national-forest areas by States, and for lists of national monuments and national game-refuges, located wholly or in part within national forests, address the Forest Service, Washington, D. C.

<sup>1</sup> Areas characterized by timber large enough for sawlogs (lumber) in accordance with the practice of the region, regardless of its actual use. Status, close of 1938.

<sup>2</sup> Includes trees large enough for lumber, cross ties, veneer, and similar sawed or sliced products, on commercial forest-land area, in accordance with the cutting practice of the region concerned. Status, close of 1938.

<sup>3</sup> Estimates on the basis of lumber tally, assuming bark excluded and utilization consistent with good practice in each region. As of 1938.

<sup>4</sup> Trees of saw-timber size, cut for lumber and other commodities. Based on data of 1936.

<sup>5</sup> Based on timber killed by fire and not salvaged, 1925-29, inclusive.

<sup>6</sup> Based on timber killed and not salvaged, 1920-29, inclusive. Includes only large-scale or cataclysmic destruction.

<sup>7</sup> New England and Middle Atlantic States combined, the area northeasterly from the Potomac River.

<sup>8</sup> Illinois, Indiana, Iowa, Missouri, and Ohio.

<sup>9</sup> Michigan, Minnesota, and Wisconsin.

<sup>10</sup> States south of the Ohio and Potomac Rivers, including Arkansas, Louisiana, and the easterly portions of Oklahoma and Texas.

<sup>11</sup> Idaho, Montana, Oregon, and Washington.

<sup>12</sup> Arizona, Colorado, Nevada, New Mexico, Utah, Wyoming, and 5 southwestern counties of South Dakota.

<sup>13</sup> North Dakota, South Dakota (except 5 southwestern counties), Nebraska, Kansas, and the westerly portions of Oklahoma and Texas.

<sup>14</sup> Growth and depletion considered negligible.

Forest Service. Estimates for the Joint Congressional Committee on Forestry.

Office of Chief Statistician, Civilian Conservation Corps.

NOTE: The Department of Agriculture was in charge of the technical direction of the work of 1,016 of the total number of 1,503 C. C. C. camps during the fiscal year 1941. During this period, within the Department of Agriculture, there was an average of 392 camps under the technical direction of the Soil Conservation Service. The great majority of the specific erosion-control work, listed in this table, was performed by these camps. Forest-fire prevention work was largely under the direction of the Forest Service.

TABLE 840.—*Civilian Conservation Corps: Forest-fire prevention work completed during fiscal year, 1941*

Office of Chief Statistician, Civilian Conservation Corps.

NOTE.—The Department of Agriculture was in charge of the technical direction of the work of 1,016 of the total number of 1,508 C. C. C. camps during the fiscal year 1941. During this period, within the Department of Agriculture, there was an average of 392 camps under the technical direction of the Soil Conservation Service. The great majority of the specific erosion-control work, shown in this table, was performed by these 392 camps.

<sup>1</sup> Unless otherwise stated, estimated by J. E. Lockwood.<sup>2</sup> Croppage figures by Bureau of Census prior to 1923 cover only the annual value of products of which exceeded \$500. Since that time \$5,000 value is the limit.<sup>3</sup> Imports and exports for seasons prior to 1926 included wood turpentine and wood rosin.<sup>4</sup> Market prices—Unweighted for seasons 1917 through 1920; weighted for seasons 1921 through 1940.<sup>5</sup> Unit—1 barrel (50 gallons) turpentine and 3½ barrels (500 pounds gross each) rosin.<sup>6</sup> Trade estimate.<sup>7</sup> Bureau of the Census.<sup>8</sup> Bureau of Chemistry and Soils.<sup>9</sup> Bureau of the Census and Bureau of Chemistry.<sup>10</sup> Turpentine and Rosin Producers' Association.<sup>11</sup> Bureau of Agricultural Chemistry and Engineering.

<sup>1</sup> From reports of Bureau of Foreign and Domestic Commerce.<sup>2</sup> Prior to 1937, figures are for calendar years.<sup>3</sup> Chiefly unreported retail sales of turpentine and unreported industrial consumption of rosin.<sup>4</sup> Gum, reclaimed gum, and steam-distilled wood turpentine and rosin, estimated by J. E. Lockwood.<sup>5</sup> Rosin production includes reclaimed gum rosin.

Bureau of Agricultural Chemistry and Engineering.

TABLE 862.—*Turpentine and rosin: Reported industrial consumption, United States, average 1934-38, annual 1939 and 1940*

<sup>1</sup> Weight as delivered at original shipping point. In the case of freight transported over several different railways, each ton is counted only when transported by the first railway. Some traffic, reshipped under new billing without benefit of transit privileges or proportional rates, may be counted more than once.

<sup>2</sup> Average revenue per ton varies partly because of unequal rates per 100 pounds for equal distances, and partly because of unequal average lengths of haul. Average revenue per car varies for the same reasons, and also because of unequal average numbers of tons per car.

Bureau of Agricultural Economics. Compiled from reports of the Interstate Commerce Commission.

TABLE 870.—Revenue freight originated and freight revenue: Products of agriculture, animals and animal products, Class I railroads, United States, 1940

| Commodity group or class, as classified by Interstate Commerce Commission | Revenue freight originated <sup>1</sup> |                      |                      | Freight revenue |   |   |

<sup>1</sup> Weight as delivered at original shipping point. In the case of freight transported over several different railways, each ton is counted only when transported by the first railway. Some traffic, reshipped under new billing without benefit of transit privileges or proportional rates, may be counted more than once.

<sup>2</sup> Average revenue per ton varies partly because of unequal rates per 100 pounds for equal distances, and partly because of unequal average lengths of haul. Average revenue per car varies for the same reasons, and also because of unequal average numbers of tons per car.

Bureau of Agricultural Economics. Compiled from reports of the Interstate Commerce Commission. "N. o. s." means "Not otherwise specified."

Agricultural Marketing Service. This tabulation is the result of a survey made in mid-June 1941. Since 1921 there has been an increase of 223,000,000 cubic feet, or 41 percent, in gross refrigerated space in cold-storage warehouses and meat-packing establishments in the United States. Of the 766,383,000 cubic feet of gross space shown in the tabulation, about 72 percent was net piling space. For further details, see processed report of December 1941 on Refrigerated Warehouse Space Survey.

<sup>1</sup> Estimated membership and estimated business for each association is credited to the State in which the association has its headquarters.

<sup>2</sup> A marketing season includes the period during which the farm products of a specified year are moved into the channels of trade. Marketing seasons overlap.

<sup>3</sup> Includes independent local associations, federations, large-scale centralized associations, sales agencies, independent service-rendering associations, and subsidiaries whose businesses are distinct from those of the parent organizations.

<sup>4</sup> Includes members, contract members, and shareholders, but does not include patrons not in these categories.

Farm Credit Administration.

<sup>1</sup> A marketing season includes the period during which the farm products of a specified year are moved into the channels of trade. Marketing seasons overlap.

<sup>2</sup> Includes independent local associations, federations, large-scale centralized associations, sales agencies, independent service-rendering associations, and subsidiaries whose businesses are distinct from those of the parent organizations.

<sup>3</sup> Estimates are based on data collected by the Farm Credit Administration in cooperation with the banks for cooperatives and the State agricultural colleges for 1936. This column includes 9 associations in Puerto Rico, as follows: Cotton, 1; dairy products, 1; fruits and vegetables, 2; tobacco, 2; and miscellaneous, 3.

<sup>4</sup> Includes ginned cotton, cottonseed, cottonseed oil, cottonseed meal, etc.

<sup>5</sup> Includes associations handling commodities not specified above, those handling several types of commodities, and those furnishing special services.

<sup>6</sup> Includes members, contract members, and shareholders, but does not include patrons not in these categories.

<sup>7</sup> Includes some intra-association business.

<sup>8</sup> Includes the value of commodities for which associations render essential services either in marketing or purchasing and the value of commodities sold by associations either on a commission or a brokerage basis.

<sup>9</sup> Includes some Government loan cotton.

<sup>10</sup> After adjustments for purchasing business by the marketing associations and marketing business by the purchasing associations, the totals for purchasing business are: 1937-38, \$440,000,000; 1938-39, \$416,000,000; 1939-40, \$448,200,000; and 1940-41, in excess of \$450,000,000.

Farm Credit Administration. Data for seasons prior to 1936-37 appear in the Yearbook and in Agricultural Statistics.

<sup>1</sup> These committees constitute the State and county organization of the cooperative agricultural planning program, sponsored by the U. S. Department of Agriculture and the State agricultural colleges. Within each county, there are a number of community agricultural planning committees not here reported.

<sup>2</sup> The agencies of the Department of Agriculture most frequently represented on State and county agricultural planning committees were: Farm Security Administration, Agricultural Adjustment Administration, Farm Credit Administration, Soil Conservation Service, Forest Service, and Rural Electrification Administration.

<sup>3</sup> Agricultural planning committees had not been organized in Pennsylvania at the time of this report.

Division of State and Local Planning, Bureau of Agricultural Economics.
